

## Application

Pump is used at one of the biggest candle factories in Poland, same customer use also multiple number of CT pumps.

CTV pump works in application for production of "paraffin flakes".

Most of the candles are not casted from molten paraffin wax but are pressed from small paraffin flakes.

In this application CTV pump is pumping hot molten paraffin wax to nozzles creating paraffine mist, it's cooling down in the air and creating "paraffine snow" that is falling down on cooled roller, next it is scraped from the roller creating paraffine flakes used for production of candles.

## Basic

**Product code:** CTV40-12.5S-22

**Product description:** CTV Vertical centrifugal pump in Stainless Steel with 2,2kW motor.
